Experience

Ezzati Academy - Tabriz, Iran - Full Stack Developer

Apr 2023 – Mar 2026

- Refactored a legacy pure PHP codebase into a modern Laravel MVC architecture, improving scalability, maintainability, and performance by 60%.
- Enhanced UI/UX and core features, resulting in 30% better overall user experience.
- Designed and implemented key modules: reporting tools, tracking systems, course licensing, installment payments, import/export tools, certificate generator, student networking, and CV builder.
- Optimized WordPress website performance, reducing load time from 20s to 8s by developing custom plugins and removing redundancies.
- Developed Telegram bots and RESTful API microservices for VIP channel management and automated content workflows.
- Built 2 WordPress plugins integrated with REST API-based licensing systems.
- Implemented AI-driven automation solutions that increased organizational productivity by 40%.

Web Creation - Tabriz, Iran - Freelancer

Nov 2022 – Sep 2023

- Transformed 2+ underperforming corporate websites into modern, responsive platforms, achieving an average Google PageSpeed score of 90+ and strong Lighthouse scores.
- Operated a business automation system with full CRM and customer engagement workflows.
- Delivered all projects with a focus on performance, usability, and maintainability (Lighthouse score of 90+).

Rastchin Market - Tehran, Iran - Full Stack Developer

Dec 2022 – Apr 2023

- Developed, prepared and commercialized 2 digital products (web systems + reusable scripts), generating 100+ sales.
- Built and launched a subscription-based platform with licensing and access control, achieving 50+ sales.

Codeyad Academy - Esfahan, Iran - Teacher

Mar 2025 – Present

- Trained 150+ students in real-world WordPress theme development, building production-ready applications.
- Conducted and delivered hands-on Laravel + AI projects to 2,500+ students, teaching backend development and cost management systems.
- Mentored 2,500+ students on clean code, software architecture, and industry best practices.
